

BUILD-A-BONE

Build your own skeleton with things around your house!

Materials Needed:

- Construction paper
- Straws
- Pasta
- Q-tips
- Scissors
- Glue

Instructions

1. First, pick what you want to use for your bones! You can use things like pasta, q-tips and straws. (Note that if you are using straws, you will have to cut them.)
2. Take the item that you picked and lay out your skeleton on your construction paper. Make sure you don't forget any body parts.
3. Once you have laid out your full skeleton, you can glue your creation to the paper.
4. Bonus: How many bones are in the human body? What bones do you know? Write down your answers on your skeleton art, and if you don't know, ask an adult to help you find the answers!
